

Learn About Historic Building Repair Techniques at the *FAWLTY TOWER*

All Saints Church, Welborne

6th & 7th July 2018, 11.00 am-4.00 pm

14th & 15th July 2018, 11.00 am-4.00 pm

The Fawilty Tower project at All Saints Church Welborne, is coming to an end; the repairs and improvements have been successfully completed, and our village church is ready to be used again.

In order to maintain the church in its improved state, we will be hosting a series of introductory sessions in which you can learn about the repair techniques, materials and skills required to maintain historic buildings.

These will be informal hands-on practical learnings sessions, led by expert conservation professionals. We will cover the use of lime mortars, renders, plasters, and paints for the repair of historic buildings.

No prior knowledge or skills are required, only an interest in learning about traditional repair techniques for historic buildings. The more sessions you are able to attend, the more you can learn (further follow on workshops will be planned for the autumn).

Please sign up for training sessions to learn the skills necessary to care for our historic churches, and other local historic buildings.

Please contact Richard Took (rjt1940@icloud.com), or Dean Sully (d.sully@ucl.ac.uk) to find out more and to sign up for the sessions.
